SUMMARY

I am graduated from Indonesia Membangun University with an Bachelor Degree in Informatics Management. I have a strong passion for Programming and started learning the basic to Mastering C#. For more details see at : https://eri-resume.vercel.app/

EXPERIENCE

OCT 2024 – PRESENT PT. BERLIAN SISTEM INFORMASI PART-TIME

Developed and maintined Web applications for client projects, covering both front-end and backend development

New DNet (Dealer Network) – (Mei 2026 – Present)
Migrating the legacy DNet system to a new microservice-based platform.

- Migrating the Training Management System module from legacy DNet to New DNet.
- Developing integration with SAP for Delivery Order processing.
- Applying Domain-Driven Design (DDD) to structure business logic into clear domain boundaries.
- Implementing Redis caching to improve application performance.

Tech Stack: C#, .NET, Domain-Driven Design (DDD), Microservices, Entity Framework, SQL Server, Redis, Docker

DNet (Dealer Network) – Change Request Team (Jan 2025 – Feb 2026)
Developed new features and enhancements for DNet After Sales, the dealer network system of MMKSI (Mitsubishi Motors Krama Yudha Sales Indonesia).

- Built a randomized customer satisfaction survey generator for after-sales service.
- Developed a global service reminder feature with automatic re-notification (up to 3 times) to remind end customers to complete the survey.
- Integrated DNet with the DMS (Dealer Management System) for service reminder follow-up.
- Fixed bugs in the E-Coupon Free Service module

Tech Stack: C#, VB.NET, AutoMapper, SQL Server (Views, Stored Procedures)

Hyto – Employee Competency Assessment Module (Oct – Dec 2024)

- Design and built a new competency assessment feature for the Hyto application.
- Developed competency assessment master data management, enabling administrator to define and maintain comptency standards.
- Built assessment reports to give management visibility into employee competency results

Tech Stack : C#, ASP.NET Framework 4.5, Dapper, SQL Server

FEB – OCT 2024 LAPI – ITB PART-TIME

As Web Developer developing and maintaining web applications PROPAR - Property Asset And Recovery **PHE SHU PERTAMINA** using ASP.Net 4.8, Entity Framework, on the job desk :

- Refactoring Code adjust enhancement
- Processing Async import Excel
- Consume External API's regional and Structure Master Hierarchy
- Create Scheduler (Hourly, Daily, Weekly, Monthly, Yearly) for update data
- Collaborated with stakeholders to define project requirements and timelines

Others Job :

- Set up Virtual machine
- IIS Configuration for application (.Net 4.8 and Net Core 6)
- Setup Database Microsoft SQL Server

2022 – 2023 **PT - SAWERIGADING MULTI KREASI**

Frontend Developer

Design and develop user interface for web application using ReactJS Library with Next.js Framework. Work with backend developers to integrate frontend components with C# (.Net 8) API. Implement responsive design and optimize frontend performance.

2021 – 2022 **PT - SAWERIGADING MULTI KREASI**

Full Stack Developer

- Develop and design APIs using PHP with Laravel 8 framework to support frontend integration. Some APIs return response data in textual and spatial formats in GeoJSON format.
- Design and develop user interfaces using Next.js and React. Implement responsive design and optimize frontend performance.
- Development of Social Assistance Information Web Application System for Musi Banyuasin Regency with Net Core 3 and PostgreSQL database.

2019 – 2020 **PT. ARKAMAYA**

Software Engineer

Most of the projects developed are applications for Toyota Manufacturing Motor Indonesia, such as tracking goods from vendors to TMIN using the RFID reading method. This development follows Toyota's development standards known as TDK using the C# Programming Language, SQL Server

2015 – 2019 **PT VIRTUA INTERNASIONAL PRATAMA**

Software Engineer

As a web developer at PT. Virtua Pratama, working on government-based projects such as those for the Geospatial Information, most of the work involved developing Geographic Information Systems (GIS) applications using C# programming language and PostgreSQL database

PROJECTS

PIR - POTENSI INVESTASI REGIONAL PT VIRTUA INTERNASIONAL PRATAMA

Web Application

PIR is a geospatial-based information system for investment potential and opportunities in 38 Province 514 Regencies/Cities in Indonesia and is part of the website of the Ministry of Investment Coordination Board (BKPM). PIR contains regional profile information including demographic data, commodities, income and the Regional Minimum Wage (UMR), as well as supporting infrastructure.

Below is the technology used

- ASP Net Core 8
- PostgreSQL
- React JS (Next.JS)\

SISTEM INFORMASI BANTUAN SOSIAL MUSI BANYUASIN

Web Application

This application is to see the distribution of social assistance receipts for the Musi Banyuasin people. Below is the technology used

- ASP Net Core 3
- PostgreSQL

EDUCATION

Universitas Padjadjaran , 2006 – 2010

Associate Degree: Information Management

Universitas Indonesia Membangun, 2025 -2026

Bachelor Degree: Information Management

INFORMAL EDUCATION

- **Laravel Development** - Sanbercode 26 April - 28 May 2021 Sanbercode
- **Udemy :** React & Typescript – The Practical
- **Udemy :** Master the concept of microservices API development using the Hexagonal Architecture in Go Instructor **Ashish Juyal**
- **Udemy :** The complete guide to building an app from start to finish using .Net 7.0, React 18 (with Typescript) and Mobx Instructor **Neil Cummings**
- **Udemy :** How to configure best media server for developing asp.net core application Instructor : **Biswa Nath Ghosh**
- **Udemy :** OOP fundamentals applied to the C# programming language Instructor : **Zoran Horvat**
- **Udemy** : Guide to the Flutter SDK Flutter Framework Instructor : **Maximilian Schwarzmüller**
- **Cerifications,** Mirosoft Technology Associate : certification number : F334-6286

SKILLS

Programming Language :

a. HTML, Javascript, Jquery, CSS, Bootstrap, Tailwind
b. ReactJS, Next.JS
c. C# ASP .Net Net Core
d. PHP : Symfony, Laravel

Database

a. MySQL
b. PostgreSQL
c. Microsoft SQL Server
d. SQlite

Tools

a. Visual Studi 2022
b. VS Code
c. DataGrip
d. Fork, Git Bash

Operating System

a. Linux
b. Windows Server
